## EDUCATION

---

### Cooding Bootcamp

*Le Wagon*

*April 2023 - June 2023*

### Civil Engineer

*Stockholm Institute of Technology*

*2013 - 2015*

## FRONTEND

---

- React
- Typescript
- Ruby
- Tailwind

## BACKEND

---

- Node.js
- Go
- PostgreSQL
- Ruby on Rails

## PROFILE

---

With my background in engineering, I have honed my problem-solving skills and attention to detail, which I believe are essential qualities for a successful software developer. I have always been fascinated by technology and have developed a strong interest in coding, especially in web development and software engineering. I'm committed to continuing my learning and development in this field and excited about the constantly evolving challenges and opportunities it presents.

## WORK EXPERIENCE

---

### Model Manager

*TENGBOM 2020- 2022*

As a Model Manager in architectural firms working on Revit projects, I am responsible for overseeing and coordinating the digital building models. I ensure that the models are accurate, up-to-date, and comply with project standards and specifications. Additionally, I collaborate with project teams to identify and resolve any design clashes or conflicts within the models. I also manage the model's organization, including file naming conventions, model versions, and model sharing protocols. Overall, my role as a Model Manager aims to optimize project efficiency, facilitate effective collaboration, and deliver high-quality architectural designs.

### Civil Enginner

*TENGBOM 2015- 2020*

As a dedicated Civil Engineer specializing in hospital and school projects, I have utilized Revit extensively to create detailed 3D models, design blue-prints, and collaborate with engineers from various disciplines, including Electrical, HVAC, and Construction. Through interdisciplinary coordination meetings, I have ensured seamless integration of different systems within the overall building design.

## LANGUAGES

---

### Swedish

*Native speaker*

### English

*Near native / fluent*

### Japanese

*Basic communication*
